Student of the Year Award Wall Upgrades

Recently the Student of the Year Award Wall received a very nice upgrade. All of the photographs, and certificates were professionally framed and matted by Lee Taylor of Taylor Glass Specialists. The work took a few weeks to complete, but the final results are perfect! The wall looks awesome!! We will be having a family visit and tour sometime soon for Maddie and her family.

Our Partners in the Student of the Year Award Plaque

Along with the Award Wall upgrades, we installed this plaque in the Award Wall Room which recognizes all of our partners in the Student of the Year program, and also honors the parents of our recipients too. The program has come a long way, and each year we have been making nice upgrades and improvements to honor these outstanding students in memory of Dad!

Shutdown due to COVID-19

In March the Novel Corona Virus hit the United States, and also very quickly reached Pennsylvania. We were shutdown for about 10 days, until we could obtain a waiver to re-open in order to machine Hill-Rom for NetShape MPP. Hill-Rom is a company that manufactures Hospital Beds, and that allowed us to re-open as an essential manufacturing business. Some of our planned events for our Student of the Year had to be postponed, however they are being re-scheduled as time progresses. The Student of the Year program is very important, and will be completed for Maddie as planned this summer. A complete summary of the program will be in the 3rd Quarter Newsletter coming in August.

Quarterly Focus / Cleaning and Disinfecting the Plant

With the recent COVID-19 Pandemic it is important to keep a clean and organized facility which is something we have always done since opening our doors 23 years ago. We have Hand Sanitizer in place for employee use, as well as Anti-Bacterial Soap available in the restrooms. The Shop is sprayed with Lysol each day and all other surfaces are periodically cleaned. We also wish to remind you to WASH YOUR HANDS for approximately the length of time it takes to sing Happy Birthday or to say a quick prayer. Even after the pandemic passes these procedures will remain permanently in place.

Over the summer steps will be taken to limit access to the interior of the Shop as well. Vern is currently working on procedures and a plan for this. There have been a few instances where people have entered the Shop via the back doors and Garage Door when they are open, and this will not be permitted anymore. We intend to keep our facility a safe, and enjoyable place to work in each day.

Mezzanine Project is Rolling Along

The Mezzanine Project which was started a few months ago is rolling along nicely. All of the old boxes, and a lot of junk was removed from the Mezzanine, and it is now organized really well. An access platform was constructed to be able to reach the Hot Water Tank which is located above the Restrooms, and a Light was also added near the Tank for use if any problems occur with the Tank. A safety cage was designed and installed at the top of the access ladder as well. So this has been a great project, and has opened up a lot of useable space in the Shop.
